Attention:

*Potential treatment types of commercial thinning (variable density or shelterwood) and pre-commercial thinning are shown on this draft map. Stand conditions, management objectives and other factors will determine whether a stand is treated with even aged (shelterwood) or uneven-aged (variable density) silvicultural prescriptions.

This product is produced from information prepared by the USDA, Forest Service, or from other suppliers. The Forest Service can not assure the reliability or suitability of this information for a particular purpose. The data and product accuracy may vary due to compilation from various sources, including modeling and interpretation, and may not meet National Map Accuracy Standards. This information may be updated, corrected, or otherwise modified without notification.

Land lines are approximate. Data on this map (i.e. riparian reserve buffers, treatment types, road and trail alignments, etc.) may be updated as field data collection occurs.
